Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to IDS submitted dated on 5/18/2007. Per Applicants' request, all items in IDS have been considered.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/14/2007 has been entered. The IDS submitted has been considered, and a double patenting rejection is issued as below.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 95 and its dependent claims of copending Application No.09/945,450. Although the conflicting claims are not identical, they are not patentably distinct from each other, the comparisons are not listed because the applicants have requested not to publish the application.

5. Claim 1 of current application is anticipated by co-application claim 95 and its dependent claims in that co-application claim 95 and its dependent claims contain all the limitations of the current application claim 1. Claim 1 of the current application therefore is not patentably distinct from co-application claim 95 and its dependent claims and as such is unpatentable for obvious-type double patenting.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. Claim 21 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 95 and its dependent claims of copending Application No.09/945,450. Although the conflicting claims are not identical, they are not patentably distinct from each other, the comparisons are not listed because the applicants have requested not to publish the application.

7. Claim 21 of current application is anticipated by co-application claim 95 and its dependent claims in that co-application claim 95 and its dependent claims contain all the limitations of the current application claim 21. Claim 21 of the

current application therefore is not patentably distinct from co-application claim 95 and its dependent claims and as such is unpatentable for obvious-type double patenting.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 and its dependent claims of copending Application No.11/321,216. Although the conflicting claims are not identical, they are not patentably distinct from each other, the comparisons are not listed because the applicants have requested not to publish the application.

9. Claim 1 of current application is anticipated by co-application claim 1 and its dependent claims in that co-application claim 1 and its dependent claims contain all the limitations of the current application claim 1. Claim 1 of the current application therefore is not patentably distinct from co-application claim 1 and its dependent claims and as such is unpatentable for obvious-type double patenting.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

10. Claims 1-10, 12-20, 21-30, 32-40 are pending for double patenting rejections. Claims 41-68, 70-78 are allowable.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
